

CMA Quality International is accredited by ANSI- ASQ (ANAB) as a certification body for the certification of management systems according to standards.

CMA QUALITY INTERNATIONAL STARTS A NEW CYCLE OF CORE COMPETENCY TRAINING

The Courses are updated to current Standards and revised for improved results. Changes are based on our previous experience, auditing, transition experience and customer's surveys received.

We believe these **(3) CORE COMPETENCY CLASSES** will ensure continual improvement for your organization.

Course Descriptions

1. ISO 9001:2015 QMS Maintenance

Based on third-party audit experience, this course brings a collaborative approach to best practices in fully maintaining and improving your quality management system.

2. AS9100D AQMS Maintenance

Based on the Third-Party auditing experience of aerospace organization transitioned to AS9100D, CMA presents this course as a hands-on and practical summary of methodologies which will assure organizations AQMS to continue developing current systems and to maintain compliance to AS9100D requirements. This course is a summary of detailed information on ways to achieve and maintain a healthy AQMS compliant to AS9100 D.

3. AS9100 D Lead Auditor Course

This course was designed by the President of CMA Quality International to provide comprehensive instruction and hands-on exercises for becoming a reliable lead (or internal) auditor within the organization, by adding skills for auditing aerospace quality management systems (AQMS) and follow the process of internal audit program, using similar process as third party auditors (certification); The course includes details from start-up and preparation of the audit up to completion through the corrective action effective implementation process and presented conclusions to the management. The course is focused on hands-on examples to develop auditing skills to the trainees.
